SUMMARY

Cloud and DevOps-focused engineer transitioning from a mechanical engineering and 4+ years administrative/ data operations background. Currently completing AWS re/Start, with hands-on experience in Linux administration, Bash/Python automation, networking (VPC, TCP/IP), and AWS services including EC2, S3, IAM, RDS, and DynamoDB. Built infrastructure automation with CloudFormation (IaC) and growing back-end skills in Python and REST API design.

SKILLS

- **Cloud & DevOps:** AWS (EC2, S3, IAM, VPC, RDS, DynamoDB, CloudFront, CloudWatch, CloudTrail, CloudFormation), Infrastructure as Code (IaC), Amazon Athena, Linux System Administration, Bash Scripting, Python, YAML, Git, CI/CD, Networking & Security
- **Databases:** Amazon RDS (MySQL, MariaDB, Aurora), Amazon DynamoDB, SQL (DDL/DML/DQL), Relational Database Design, NoSQL Data Modeling
- **Back-End Development:** Python, REST API Design, Java
- **Front-End Development:** JavaScript (ES6+), React, Tailwind CSS, HTML5, CSS3
- **Data & Analytics:** Microsoft Power BI, Google Sheets Automation, R Programming, Tableau
- **Design & Productivity:** Adobe Creative Suite (Photoshop, Premiere, InDesign, Illustrator), Canva, Google Workspace, MS Office
- **Languages:** Malay (Native), English (Fluent), Arabic (Basic), Turkish (Basic)

TECHNICAL PROJECTS

AWS Infrastructure Automation with CloudFormation | AWS CloudFormation, YAML, VPC, EC2, IAM | Jun 2026

Repository : <https://github.com/ammarrsli93/aws-cloudformation-vpc-ec2>

- Developed an Infrastructure as Code (IaC) solution using AWS CloudFormation (YAML) to provision an Amazon VPC, private subnet, internet gateway, route tables, security groups, and a t3.micro EC2 instance from a single declarative template.
- Configured security groups for controlled SSH access and published the reusable template to GitHub, demonstrating repeatable, consistent infrastructure provisioning.

Usrati Jannati (Family Tree & Faraidh Calculator) | JavaScript, React, Tailwind CSS, REST APIs | Jan 2026 – Present

- Building a web app that generates family trees and calculates Islamic inheritance (Faraidh) shares, secured with Google OAuth 2.0.
- Integrating the JAKIM e-Solat REST API to deliver real-time, geolocation-based prayer times.
- Structuring algorithmic relational logic to calculate accurate Islamic inheritance distributions based on complex user input.

Cop (Class & Venue Booking System) | JavaScript, React, Tailwind CSS, Data Handling | Aug 2025 – Present

- Building a class and venue reservation platform with a responsive, real-time booking dashboard.
- Implementing dynamic state management to handle real-time venue availability and multi-user booking flows.

Student's Intake Dashboard | Google Sheets, Data Visualization | Dec 2024

- Developed a dynamic analytical dashboard for Universiti Malaysia Kelantan to visualize enrollment trends from 2022 to 2024.
- Provided strategic data insights that optimized university intake processing pipelines and administrative workflows.

Supermarket Sales Dashboard | Microsoft Power BI, Kaggle Datasets | Jun 2024

- Built an end-to-end interactive business intelligence dashboard performing ETL workflows on public retail datasets.
- Synthesized complex raw transaction records into clean visual charts to surface actionable revenue trends.

EXPERIENCE

Career Break

Profesional Development | Kota Bharu, Kelantan | Mar 2025 – Present

- Completed 300+ hours of structured technical upskilling in modern front-end architectures , web development tools, and version control systems.
- Actively engineered multiple web applications to master complex state management, data-handling workflows, and secure user authentication.
- Participated in the AWS re/Start cloud program, gaining hands-on experience in AWS cloud services, Linux system administration, Python automation, networking, security, databases, and cloud infrastructure.
- Developed practical skills with AWS services including EC2, S3, IAM, VPC, RDS, DynamoDB, and CloudFormation for Infrastructure as Code (IaC).

Faculty Of Veterinary Medicine, Universiti Malaysia Kelantan

Administrative Officer (Part-Time) | Kota Bharu, Kelantan | Mar 2023 – Mar 2025

- Designed and implemented a standardized, structured intake SOP, **accelerating application workflows by 50%.**
- Leveraged Google Sheets and data-driven automation to optimize student enrollment, directly **contributing to RM 1,095,000 in revenue for the university** in 2024.
- **Boosted target outreach engagement by 28%** by executing data-driven digital marketing and promotional campaigns.

Centre Of Academic Management, Universiti Malaysia Kelantan

Assistant Administrative Officer (Part-Time) | Bachok, Kelantan | Sept 2021 – Mar 2023

- Streamlined international admissions workflows through targeted process optimization, **reducing international student's offer letter processing latency by 40%.**
- Automated financial tracking with Google Sheets, **increasing reporting efficiency by 20%.**
- Spearheaded migration to modern Google Workspace tools, persuading a 5-person team to shift from print-based document handling to shared digital access for secure hybrid operations, **saving an estimated 10% in paper and printing costs and reducing document review time by approximately 30%.**

Omorfia Pictures

Photographer (Part-Time) | Kota Bharu, Kelantan | Aug 2018 – Sept 2021

- Maintained a 90% on-time project execution record , drastically enhancing client satisfaction metrics and business retention.
- Generated professional-grade multimedia collateral utilizing Adobe Creative Suite to fulfill requirements for 40+ independent clients.

CERTIFICATIONS & EDUCATION

AWS re/Start Program | Forward College | Jul 2026

- Engineered cloud infrastructure solutions on AWS, deploying EC2 compute, S3 storage, IAM security policies, VPC networking (CIDR, Subnetting, IPv4/IPv6, TCP/IP), and managed database services including Amazon RDS (MySQL, MariaDB, Aurora) and Amazon DynamoDB for scalable NoSQL workloads.
- Administered Linux environments on Amazon EC2 via SSH and AWS Session Manager, applying Bash scripting and Python automation for system administration and cloud database management via RDS and DynamoDB.

Google Data Analytics Professional Certificate | Coursera | Jul 2023

- Mastered data analysis workflows across the 6-step framework (Ask, Prepare, Process, Analyze, Share, Act) utilizing SQL, R programming, and Tableau.

Microsoft Power BI Professional Course | Microsoft Learn | Jun 2024

- Developed competencies in data modeling, data transformation pipelines, ETL workflows, and interactive business intelligence dashboard design.

Responsive Web Design Certification | freeCodeCamp.org | Dec 2024

- Completed 300 hours of core frontend programming focusing on modern responsive layout architectures, HTML5, CSS3, and semantic web structure.

Bachelor of Engineering (Mechanical-Automotive) with Honours | Gombak, Selangor | Feb 2019

International Islamic University Malaysia
